

8th World Congress for Hair Research

May 14~17, 2014, Jeju Island, Korea

Wonder of Nature, Wonder of Hair

3D Secure Manual

(Visa, Master, JCB)

The **3D Secure protocol** was developed by Visa to improve the security of Internet payments. The protocol is offered with the service name Verified by **Visa, Master and JCB** has also adapted a similar protocol called their secure Code.

The objective is to benefit all participants by providing issuers the ability to fully authenticate cardholders through the use of a password during Internet purchases, reducing the likelihood of fraudulent usage and improving overall transaction performance.

- Overseas Payment Service was approved with only credit card number and expiration date. But it will be provided with 3D secure protocol because of fraud prevention.
- The 3D Secure protocol was developed by Visa. VISA provide verifying system to activate it on the secure Visa site.
- Visa, Master, JCB support 3D Secure.
- If the card issuer doesn't provide 3D Secure, you can not be paid on online with their credit card.

- 3D secure can be used after enter your information on card issuer's website.
